Dreaming of those lazy summer days?

Did you know that in as little as six weeks from start to finish you could be relaxing on that beautiful porch, deck or sunroom?

Creating outdoor living areas is one of the most frequently requested projects for Liberty Hill Construction.

There is no better way to enjoy summer afternoons than escaping to your personal retreat .

Contact us today....

News from the Hill...

For many years I have wanted to create a newsletter that highlighted the changes, growth and improvements that we have been making here at Liberty Hill Construction. Finally, we have completed Volume 1, Issue 1 of "News from the Hill."

Thank you for your letters, referrals, and taking the time to read through "News from the Hill." We always welcome and look forward to your ideas and input. Please contact us at any time.

Sincerely,

Greg Rehm, CGP, CAPS

Creating the first newsletter has been exciting. Our goal is that this newsletter and the issues to follow will keep you current on changing trends in the remodeling industry and changes within our company. We hope it will also assist you with decisions you may be considering as you continue to invest in your most important asset, your home.

Since its inception, Liberty Hill Construction has been fortunate to experience continual growth. By developing lasting relationships with you, our clients and professional trade partners, our business continues to prosper even through difficult economic times. Remodeling your home is a significant decision, and we thank you for placing your trust in us. Your support and trust has helped us to become one of the leading design/build companies in the greater Bedford area.

Greg, Kate, Marley and Annie Rehm

Our new office and workshop is coming along

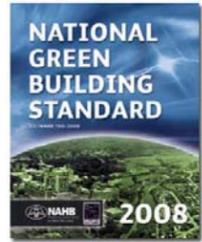

If you have been driving along Liberty Hill Road lately you may have seen some new construction. Check out our web site to see the progress on our new carriage house. It should be ready for visitors by May!

Professional Development

Greg recently completed the courses and testing requirements to earn his (CGP) Certified Green Professional designation from the National Association of Home Builders in Washington, DC. You will now see the CGP designation proudly displayed after his name!

We have all heard about the green building movement

Palmquist sunroom addition

What is green remodeling?

A home can be considered green when energy efficiency, water and resource conservation, sustainable or recycled products, and indoor air quality considerations are incorporated into the process of building.

The most important thing to us is to provide you with a smorgasbord of options on green building. You do not have to do everything!

Pick and choose among the hundreds of options for the design features and building products that serve your best interests. There is no such thing as the right or wrong set of products.

On your next project, ask us how to incorporate green elements that will bring you comfort for years to come.

Meet the team at Liberty Hill Construction

Peter Sapounas has been with Liberty Hill Construction for three years, many of you have already met Pete on site at your projects. Currently, Pete continues to take on many new project management and estimating responsibilities. He is enthusiastic about the challenges and is actively pursuing continuing education.

Candace Grocott manages all the business accounting. Her expertise and organizational skills have elevated our job costing and analysis to a new level. This provides us with the tools to refine operating policies and procedures, helping to lower our overhead costs.

Most recently, we have enlisted a local marketing company, 2difore Marketing Solutions, LLC, to help with many aspects of marketing, including updating our web site. *Dianne Beaton* and *Diane Robinson* are two dynamic marketing professionals who have a unique perspective in the building and remodeling industry.

Lastly, thank you to our many trade partners. Without their expertise, knowledge, professionalism and continued support, we could not continue to provide you with the exceptional service that is Liberty Hill Construction.

Liberty Hill Construction stays up to date with construction trends

With the continuous influx of new ideas and products, we at Liberty Hill Construction feel that education is critical in the building and remodeling industry. To assist you in maximizing your investment, we incorporate current trends, practices and materials while planning and designing your project.

We have recently completed our third year at JLC Live (Journal of Light Construction), New England's most comprehensive residential construction conference. Ask us what we learned!

We need your help staying "green"

In the future, we would like to correspond electronically, but need your email address. Please send us a quick note to info@libertyhillconstruction.com so that we can update our address book. We will not share your email address.

As an incentive, we will enter your name into a drawing for a complimentary consultation with interior designer Julia Dias, BFA. Julia, a Bedford resident has been an Interior Designer for 22 years, earning her degree from UMASS Amherst.

We look forward to hearing from you.

Williams theater room

Now offering preventative maintenance site reviews

Due to severe ice storms and inclement weather, you may have some questions regarding the condition of your home and property. Common concerns include roof and siding issues, water damage, potential for mold and mildew, as well as general health and safety.

If you would like to schedule a complimentary review, please email us at gregrehm@libertyhillconstruction.com.
